PERSONAL PROFILE

- Pioneering Frontend Technical Lead with about **7 years** of strong experience of web and hybrid mobile apps.
- An energetic, self-motivated team member with hands on experience in programming skills and frontend development.
- Writing unit test cases for both mobile & web applications.
- Excellent analytical, problem solving skills.
- Strong communication and coordination, interpersonal and team playing skills.
- Agile methodology professional who loves to work in a competitive environment.
- Ability and willingness to adapt quickly to new domain and technologies.

WORK EXPERIENCE

ING DiBa AG - External Consultant from HCL Technologies | Technical Lead | Frankfurt, Germany | Jan 2020 to Current

- Worked as part of Enterprise Architecture team to learn, observe and authorize the standardized approach to build Frontend applications, so that it uses the maximum out of available reusable components inside the organization.
- Designed and developed the Blueprint Application (a starting point for many projects in order to maintain the standards of ING) which saved almost couple of sprints time for each team.
- Contributor in the reusable deployed library/components for the other developers to use inside ING organization.
- Worked on setting up CI/CD pipeline on GitLab using the GitLab Runners, as well as on Azure DevOps due to migration.
- Worked on setting up the domains and context paths for each POC application for the test environment.
- Worked closely with the product owner and tribe architect to collect business requirements and finalized technical designs.

ITC Infotech, India - Associate Consultant | External Senior Developer from Mobinius Tech. | July 2017 to January 2020.

- Developed and lead 2 Angular 4/7/8 based web applications.
- I was involved in many activities like, lead the team, set up the architecture of the project structure and develop the key features like profile management, RBAC, project wise sprint tracker with interactive charts using c3js and d3js. in web application called **ZICOS** (Developed in Angular 4/7), which is an orchestration of all the DevOps tools to get the consolidated data inside any project in your organization.
- I was part of the leadership team for Columbia University Student Information System.
- Maintained the branching strategies for releases.
- Reviewed the merge/pull requests raised by team members and suggested optimized and reusable ways to achieve the same.
- Unit test cases using Karma & Jasmine.

Syntel Limited, India - Software Engineer | July 2014 to June 2017

- Developed 2 hybrid mobile apps, a web app and a plethora of POCs being a part of Research & Development team called Mobility.
- Involved in requirements gathering, architecture, application design and POC execution for all the applications and developed the web pages with dataflow of applications.
- Identified issues and risk involved in the application.
- Performed Unit Testing as well as Manual Testing.
- Hybrid App: HDMS Draw (Angular 2, Ionic 2) for the measure technicians of Home Depot , JHRPS 401K (JavaScript) for the customers to register, login and take actions about their retirement plan services.
- Learned, architect, developed & lead the web app for RSA Insurance back office for the after call & before call purposes.
